SUMMARY

Senior Software Engineer with **7+ years** of experience designing and scaling **distributed systems**, **real-time communication platforms**, and **high-throughput microservices**. Proven track record of **owning systems end-to-end (design - production - scale)**, driving architectural decisions, and enabling **AI-powered production systems**. Strong expertise in **Java**, **Spring Boot**, **Kafka**, and **cloud-native systems on AWS**.

EXPERIENCE

Senior Member of Technical Staff
Salesforce

Dec 2024 – Present
Hyderabad, India

- Led design and delivery of a **real-time Voice Communication Platform** supporting **AI-driven workflows**, handling **low-latency audio streaming** and real-time transcription pipelines at scale.
- Owned **system architecture end-to-end**, including service boundaries, Kafka event design, and scaling strategy for **high-concurrency workloads**.
- Built **AI-integrated real-time pipelines** to process and stream transcription data, enabling **Agentforce Voice for telephony workflows**.
- Designed **low-latency media streaming using WebSockets**, optimizing packet handling and reducing transmission delays.
- Implemented **Java 21 Virtual Threads**, improving concurrency model, reducing thread contention, and increasing throughput under peak load.
- Designed **backpressure handling and load-shedding mechanisms** (Kafka + WebSockets), ensuring stability under burst traffic and preventing cascading failures.
- Defined and implemented **observability standards (metrics, tracing, alerting)**, reducing mean time to detection (MTTD) and improving reliability.
- Mentored **4+ engineers** on secure coding practices, driving adoption through reviews and guidelines.
- Drove **cross-team design collaboration** with Product, Infrastructure, and Security teams, improving deployment velocity and integration reliability.
- Introduced **Terraform-based infrastructure-as-code standards**, ensuring consistent deployments across environments.

Software Engineer - II
UiPath

Jul 2021 – Nov 2024
Hyderabad, India

- Owned a **high-scale integration platform** handling **10k+ requests per second** across **200+ external vendor integrations**.
- Designed and deployed an **ML-based security pipeline using DistilBERT**, in production including preprocessing, inference optimization, and **real-time production API integration**.
- Designed **fault-tolerant microservices architecture** with retries, circuit breakers, and rate limiting to improve resilience and prevent cascading failures.
- Built **idempotent and retry-safe APIs**, ensuring data consistency across asynchronous workflows and partial failures.
- Reduced system latency by **30%** through Redis caching strategy and JVM performance tuning.
- Built **scalable inference workflows on AWS Lambda**, optimizing cold-start latency and throughput for **real-time AI decisioning**.
- Migrated workloads to **AWS Graviton instances**, reducing infrastructure cost by **20%** while maintaining performance.
- Enforced **OWASP best practices**, reducing vulnerability exposure by **20%**.

Application Developer
Thoughtworks

Aug 2019 – Jul 2021
Hyderabad, India

- Built **event-driven data pipelines using Kafka**, enabling real-time synchronization across **10+ external systems**.
- Migrated legacy systems to **Gradle-based CI/CD pipelines**, reducing deployment time by **40%**.
- Championed **Test-Driven Development (TDD)**, maintaining **90%+ unit test coverage**.

Software Engineer (Intern to Full-time)
FICO

Feb 2019 – Aug 2019
Bangalore, India

- Containerized applications using **Docker** and deployed on **Kubernetes/OpenShift**.
- Automated infrastructure provisioning using **Ansible**.

SKILLS

Languages	Java, C++, Python, JavaScript, SQL
Backend	Spring Boot, REST APIs, WebSockets, Hibernate
Distributed Systems	Kafka, Event-Driven Architecture, Concurrency, HA, Fault Tolerance
Cloud & DevOps	AWS (Lambda, EC2, S3), Docker, Kubernetes, Terraform, Jenkins
Databases	MySQL, PostgreSQL, DynamoDB, Redis
Observability	Prometheus, Grafana, Splunk, Micrometer
AI/ML	NLP, BERT, DistilBERT, LLM Integrations, Prompt Engineering
Expertise	System Design, Performance Optimization, Security (OWASP), TDD

EDUCATION

Integrated B.Tech + M.Tech in Computer Science, IIIT, Noida

2014 – 2019
